

Opt Out Washington....Protect Your Kids from the SBAC Test Monster!

In 2015, students in Washington will be subjected to the SBAC test - one of the most unfair tests ever made! While only 14% of Washington students were “below grade level” on the 2013 National Assessment of Educational Progress test, **61% will be labeled as failures by SBAC!**

This alone would make the SBAC test the most harmful high stakes test ever administered in Washington state. But this is only one of many drawbacks.

Our children are not failures! It is the SBAC test that is a failure!

Learn more about the drawbacks of the SBAC test monster and how you can protect your children by opting out of this terrible test. Download our Opt Out Form, Request a Presentation and/or start at opt out group in your school district!
